## **IT'S A GAS FOR SPACEWAY**

[Click to go back to Latest News Page](#)

Space is an expensive resource, which is why Portsmouth-based City Technology called in space solutions experts Spaceway when they wanted to create a new production area and office facilities.

Spaceway decided the best solution for the company, which manufactures gas sensors, would be to use the existing mezzanine floor for office accommodation and then install a new mezzanine floor for storage space and locate new production facilities underneath.

The project was completed in two phases, over six months, with Spaceway installing partitioning systems, air conditioning, ceilings, a mezzanine floor, floor coverings and railings. Spaceway also took care of the electrics.

“Thanks to Spaceway we now have increased storage space and a better working environment for our staff,” said Rob Love, Engineering Manager at City Technology. “The job was extremely well managed and the end result has given us the facilities to increase our production of gas sensors. We are an extremely successful company and pride ourselves on the efficiency of our operation. In today’s competitive environment it is essential that we maximise all our resources – and that includes our workspace.”

Ends.

Note to Editors:

Spaceway is one of the leading providers of integrated interior space solutions for private sector businesses and public organisations.

The company recognises that the effective and efficient use of space is a critical success factor for businesses, contributing directly not only to competitiveness but also to the morale and motivation of a workforce.

Through the company’s unique partnering approach, Spaceway aims to co-develop, design and implement the most innovative yet cost effective solution for each project regardless of its size. Whether it’s a total redesign, or a need to increase the amount of usable space in a particular area, Spaceway has the experience and expertise to ensure

the promised design concept is translated into reality – on time, to budget and with minimal disruption to business operations.
