SPACEWAY IS A CLEAR WINNER WITH BRITA WATER FILTER SYSTEMS

The installation of Komfort Mirage double glazed partitioning by integrated interior space solutions provider, Spaceway, has helped create a stylish and practical office environment for leading water filter manufacturer Brita, at the company's new 62,500 sq ft purpose built headquarters in Bicester, Oxfordshire. Spaceway was awarded the contract by project designers and builders, The Mainland Construction Group, for its ability to provide quality, cost effective products and carry out installation within a rigid time frame.

A registered contractor for Komfort interiors, Spaceway supplied and fitted the Mirage partitioning to create 18,000 sq. ft of attractive and airy office accommodation. This involved Spaceway turning Mainland's detailed designs into reality by installing 200 linear metres of solid and full height double-glazed partitioning, of which 46 linear metres was double-glazed with integral blinds. Spaceway has used the Mirage partitioning to create 12 offices and meeting rooms that now form a practical yet sophisticated working environment for the UK's market leader in water filtration.

"The new site accommodates our UK headquarters, production facility and distribution centre in a prestigious yet functional new building", says Tony Haylock, Operations Manager for Brita Water Filter Systems. "The partitioning supplied and installed by Spaceway meets our needs and safety requirements, as well as creating an aesthetically pleasing environment."

Repeatedly chosen by designers, Mirage partitioning offers numerous features that include fast installation, 30 minutes fire resistance, excellent soundproofing and easy relocation. Cleverly designed to use pre-punched steel stud and twistlock transoms, the panels are simply hung using a special clip to provide tight joints yet allow easy removal if required.

“We looked at a number of companies for this prestigious site, but chose Spaceway for their quality products, excellent reputation and first class workmanship”, said Derek Moore, Project Manager at The Mainland Construction Group. “Spaceway is extremely skilled and has great technical expertise which makes them a highly respected supplier”.

Established in 1976, Spaceway is recognised as one of the UK's leading providers of integrated interior space solutions for private sector businesses and public organisations. Located in Hampshire but serving customers across the South and Midlands, the company provides an integrated approach to space solutions that includes mezzanine floors, partitioning, suspended ceilings, storage systems, special structures as well as furniture and small parts storage. **Ends**

Notes For Editors:

About Brita Water Filter Systems Ltd

Brita Water Filter Systems Ltd is a family-owned company founded by Heinz Hankammer in 1966 in Taunusstein, a small town near Frankfurt in Germany. Having found success with the concept of a domestic water filter, Brita began exporting in 1980 and the Brita brand is now found in all five continents around the world. Brita is the driving force in the water filter category; investing significantly to grow the market from £57 million to £96.5 million in just four years. This growth has led the Company to invest \$15 million in brand new offices and a state of the art production facility in Bicester, Oxfordshire. For more information, please visit www.brita.co.uk.
