

Solutions in Action ALLSTORE, CORNWALL

The challenge

Faced with the conundrum of how to accommodate 272 storage rooms within an area of just 550 square metres for Allstore, the Spaceway Group has worked with the company to produce StackiTall™, an innovative solution for maximising storage space for archive boxes and self-storage. Finding that the storage industry had no archive storage system suitable for maximising small areas, Allstore's Managing Director, David Stephenson turned to the Spaceway Group to help him develop a solution.

Spaceway's approach

StackiTall allows for a greater number of mobile storage units to be accommodated in a confined area through a unique system that enables the units to be pulled forward and back rather than the normal left to right. This allows easy access to boxes and enables additional units to be installed, as space is no longer needed for units to be pushed along to make way for access. The StackiTall system uses a welded chassis to ensure long-term durability. Grouted, levelled floor tracks take into account uneven floor surfaces and floor infill and ramped access points ensure personnel can operate the system efficiently whilst complying with all Health & Safety issues. Additional safety measures include integral stops on the tracks and an anti-tilt device for operator protection. Each unit is fitted with special decorative end uprights to improve aesthetics and to contain the locking mechanism.

Spaceway created this..

and this....

Benefits delivered

"We chose Spaceway because it had the ability to help us develop this unique concept and it has a first rate reputation for service", said David Stephenson, MD of Allstore. "StackiTall has enabled us to achieve 272 bays to store a total of 17,260 archive boxes".

Solutions / products used

STACKITALL KEY FEATURES

- Greater number of units accommodated in small area
- Units pulled forward and back rather than left to right
- Easy access to boxes
- Grouted, levelled floor tracks take account of uneven floors
- Complies with H&S regulations
- Fitted with decorative end uprights to improve aesthetics and contain locking mechanism
