

Solutions in Action

BODYPOWER, NORTHAMPTON

The challenge

When year on year success necessitated Northampton based Bodypower Sports moving into new premises to cope with its expanding market. Transformed from a 1970's building into a prestigious new headquarters, Spaceway have creating an impressive head office that reflects the corporate values of the company. Spaceway responded to Bodypower's brief with a total office & ancillary area refit. This included a total reconfiguration of the ground floor & first floor offices including new offices, reception area, canteen, showroom and boardroom.

Spaceway's approach

With the old partitioning dismantled, the new offices, reception area and showroom were created using the latest Komfort 'Polar' manifestation partitioning and Komfort full-height doors. A powering electric kit was installed into the showroom's floor to power up the fitness equipment range so that customers could trial before buying. General building work, floor coverings, decoration, electrics, lighting, ventilation and other specialist contractor works were all carried out to the highest standard under the supervision of Spaceway's on-site project team. Finally new lighting and fire rated roller shutter doors were installed in the warehouse. A range of furniture complement the décor, including the Managing Director's office, which was fitted out with a storage wall and Italian furniture, with the same Italian, designed furniture being chosen for the boardroom.

Spaceway created this..

and this....

Benefits delivered

"Such has been our success that we needed new premises to support our expansion. We had worked with Spaceway before and knew their expertise. Once again their design work, handholding and attention to detail surpassed even our expectations."

Solutions / products used

EXECUTIVE SUITES

- Komfort Polar partitioning with manifestation
- Komfort full-height doors
