18th June 2008

Dear Malcolm

Last week we concluded the final stage of our move from 6 separate sites along the south coast into our new Delta Park packaging and distribution facility. Having successfully concluded all the various elements of the project, I would like to extend my warmest thanks and appreciation for the efforts you and your team have put in over the past 2 years from the planning and design phase, right up to installation and handover. I have found all of your team to be professional and efficient throughout and this has made a major project somewhat easier to deliver. The work you have done on the racking, the offices and your assistance in some of the building clearances has been invaluable.

I have always found Spaceway a very responsive and helpful partner and despite some of the challenges with a new-build project of this type, your team always overcame any problems that arose in a timely, professional and expert way.

I would have no hesitation in recommending your company to other organisations and look forward to working with you all again in the future.

Yours sincerely

Andrew Hammond
European Projects Director
