

# Case Study

## NEW LOOK

### PROJECT

In two separate contracts, Spaceway installed mezzanine floors for the new Lakeside and Reading Oracle Centre stores.

### CLIENT

New Look

### DETAIL

Spaceway designed, built and installed a 500 sq.m. Flooritall mezzanine floor for the clothing chain's storage area in the brand new store at Lakeside in Essex.

Working to a tight agenda, with only two weeks to manufacture the floor, Spaceway only had a two day slot in which to install it. Unable to use fork-lift trucks in the complex, the team had to wheel the steelwork for the floor through on trolleys. They were also required to work at night so as not to disrupt other stores or the New Look fit-out operators.

*New Look, Lakeside*

*New Look, Reading*

At the Reading Oracle Centre, the Flooritall mezzanine floors installed by Spaceway in shop units at the complex were not part of the original design and had to be retrofitted. The materials had to be delivered at night, and all floor installations were carried out whilst construction work continued on the complex.

Now, with a second level, the Reading store has extra space for the latest fashion.

### CLIENT FEEDBACK

*"The Lakeside store is one of the largest stores New Look has opened to date, and Spaceway worked very hard and co-ordinated well with other team members to achieve a truly stunning shopfit."*

*"The finished result of both stores is not only a credit to New Look but to the Spaceway team, who performed outstandingly well under difficult circumstances, tight time scales and delivered exactly what was agreed and required of their operation."*

**Peter Cotterill**

Store Design Controller, New Look
