

Case Study

A.MENARINI DIAGNOSTICS

PROJECT

The fit-out of an entirely new office suite - ground and first floor plus workshops.

CLIENT

A. Menarini Diagnostics

DETAIL

Spaceway used Komfort 600 series to fit-out a new office suite at Winnersh Triangle in Reading. In the warehouse, Spaceway used Komfort 75 fire-rated partitioning and built workshops which included suspended ceilings, lighting and electrics.

The project required a very flexible approach. Menarini were awaiting a lease completion, and the work had to be carried out very quickly once the transaction was complete.

CLIENT FEEDBACK

"Spaceway proved to be very professional and efficient at meeting deadlines - this meant that we could concentrate on our business rather than the move."

"They were also very flexible on the start date, which was vital with the lease situation on our new building."

"The increased size of premises - and Spaceway's expertise - has enabled us to increase business. We're grateful that the transition has been so smooth."

Trevor Arthur

Finance & Administration Officer, A. Menarini Diagnostics
