

Delacamp - Shepton Mallet, Somerset

The challenge

Spaceway South's has provided to turnkey fit out for a prestigious new 25,000 square foot UK headquarters for Delacamp in Shepton Mallet, Somerset. The building comprises of office accommodation, warehousing and a production facility. Spaceway South undertook the total project management of the fit out ensuring that all work was carried out in accordance with the Disability Discrimination Act (DDA) and under the Construction Design Management (CDM) Act 1994 relating to health and safety regulations. By using Spaceway to fit out the interior has enabled Delacamp's management team was able to focus on its core business.

Spaceway produced this.....

And this

Spaceway's approach

At the onset of the project, Spaceway produced detailed designs for each sector of the building. To maximise space for the warehouse, Spaceway suggested the installation of two FlooriTall™ mezzanine floors. Once this structural work had been completed, Spaceway fitted out the warehouse with Komfort's clean room partitioning, an Apex racking system and Troax anti-collapse mesh, a versatile anti-collapse system for cladding areas of pallet racking which face onto a pedestrian aisle.

The offices were fitted out with Komfort Kameo partitioning, suspended ceilings, a storage wall, floor covering and finished with a passenger lift. To complete the project, Spaceway installed an air conditioning and ventilation system, warehouse heating, electrics, lighting and a fire escape. Kitchens, a canteen, toilets and shower rooms were also designed and installed in the building.

Benefits delivered

"We chose Spaceway because we felt they were capable of carrying out a project of this size", said Richard Day, Managing Director of Delacamp (UK) Ltd. "Spaceway's management team were extremely professional and kept us fully informed about developments at our regular meetings. Spaceway is extremely skilled and has great technical expertise which makes them a highly respected supplier".
