

Solutions in Action

The challenge

Dream Doors Ltd, the one stop shop for door replacement and bespoke kitchen and bedrooms, has maximised the available space in its new 80 square metre headquarters thanks to Spaceway South's innovative designs, quality products and competitive pricing. The acquisition of the new premises followed substantial expansion by Dream Doors, which now has fifty franchises throughout the UK. Spaceway South has made the best possible use of the available space at Dream Doors new site at Heritage Business Park, Gosport to house the company's offices, training room, reception area and ancillary facilities.

Spaceway's approach

To kick off the project, Spaceway installed a mezzanine floor to maximise space and to accommodate the offices. Full height, solid and single glazed Komfort stud and track partitioning, with blind effect and logo, was then installed and finished off with cherry veneer doors. Spaceway also arranged for the walls to be dry lined and the installation of all electrics including fire alarm and emergency lighting. To complete the overall effect, suspended ceilings were fitted and an impressive feature staircase installed from the ground to the first floor. Finally, Spaceway fitted out the offices, training room and reception area with Komfort Konfigure 4 office desking and seating and Anco Storage wall units.

Customer Comment

"We are thrilled with our new headquarters", says Derek Lilly, Director of Dream Doors. "The contract finished on time and within budget, it was also undertaken with complete professionalism with Spaceway going that extra mile to ensure our total satisfaction".
