

Case Study

PEARSONS

PROJECT

The installation of four mezzanine floors at Pearsons TV studios.

CLIENT

Pearson Broadcast Services

DETAIL

Working to designs by Mightangle Ltd and with main contractor HBG Construction, Spaceway had to act fast to ensure that new facilities at the studios did not interfere with filming schedules for programmes such as The Bill.

The Spaceway team worked around a tight timetable to install four Flooritall mezzanine floors and Komfort partitioning to create office suites, meeting rooms, a casting room and edit suite.

In addition, a special lift providing access for people with disabilities was also installed.

CLIENT FEEDBACK

“Spaceway’s fast reaction to tight programme constraints ensured the mezzanine’s were in place when we needed them.”

David Cave
Surveyor Manager, HBG Construction
