

## Solutions in Action

### *The challenge*

When fitness equipment company, Precor Products, needed to expand its UK headquarters following the purchase of the company by the AMA Corporation, Precor Products turned to Spaceway South to reconfigure its existing head office to provide it with an additional with 200 square metres of extra office space.

Having already successfully carried out a major project for Precor Products in 2002, Company Secretary, Gill Scrutton, had no hesitation in asking Spaceway South to draw up designs for expansion.

From this.....

....to this

### *Spaceway's approach*

To kick off the project Spaceway South submitted designs to Precor Products that provided the company with the additional space required.

Work then commenced to remove existing partitioning and install a FlooriTall™ mezzanine floor to expand maximise use of the available space. New Komfort Kameo partitioning and suspended ceilings were then fitted.

To complete the project Spaceway installed all electrics, lighting, floor covering and an air conditioning system.

### *Benefits delivered*

“Spaceway had managed the redesign of our building so well in 2002 that we had no hesitation in choosing them again for the new development”, says Gill Scrutton. “The company always gives attention to detail and comes up with helpful suggestions. In addition they employ excellent staff who know exactly what they have to do and are always courteous”.

## ***Solutions / products used***

- A FlooriTall™ mezzanine floor
- Moving existing partitioning and fitting new Komfort Kameo partitioning
- Fitting suspended ceilings
- The fitting of all electrics and lighting
- The fitting of all floor covering
- The installation of an air conditioning system.
