

# Case Study

## SOLENT MOULD TOOLS

### PROJECT

To create better use of space to accommodate new machinery.

### CLIENT

Solent Mould Tools

### DETAIL

Solent Mould Tools needed to create extra space when they invested in a new machine which would take up a 5m by 12m area of the factory. The new machine was a great investment, but the layout of the warehouse had to be re-organised. The installation of a mezzanine floor created the space required, by moving the tool making and fitting department upstairs.

They are one of a few companies in the UK to boast the large-scale production capabilities of an injection mould machine.

*Mick Lloyd of Solent Mould Tools with Malcolm Plum.*

### CLIENT FEEDBACK

*"Spaceway came to the rescue with the mezzanine floor - by moving the tool section upstairs we were able to re-position workbenches underneath, freeing up space for the new machine. Spaceway also created an office upstairs for the foreman and had to reroute the lighting and electricity - and all was completed on schedule."*
