

Swift Industrial – Alton, Hampshire

The challenge

Swift Industrial Supplies decided to build an extension to the company's existing building in Millstone Park, Alton to provide an additional 800 square metres of office and warehouse accommodation.

Swift Industrial Supplies chose Spaceway South, as it was able to provide the company with a single source solution rather than the company having to deal with individual contractors.

Spaceway South was given the task of making maximum use of the limited space available to create an impressive and functional area.

From this.....

....to this

Spaceway's approach

Spaceway South began the fit out by installing a FlooriTall™ mezzanine floor into the new building to almost double the area. Once this had been completed, office partitioning, suspended ceilings, dry lining, external windows and doors were installed into the office complex and a floor installed over a racking and shelving system in the warehouse.

To complete the project, electrics, lighting, rest rooms and toilets were installed throughout the building and mesh partitioning, fire protection and security shutters were fitted into the warehouse. Finally, air conditioning, ventilation, a storage wall and furniture were fitted into the office complex.

Benefits delivered

“Spaceway South’s designs were extremely professional and we also knew that they were extremely professional as they had fitted a mezzanine floor into our last premises”, said Swift Industrial Supplies’ Director, Adrian James. “The new extension has enabled us to offer our customers even greater efficiency and service.”

Solutions / products used

OFFICES

- A FlooriTall™ mezzanine floor
- Komfort office partitioning
- Suspended ceilings
- Dry lining
- Doors
- Floor installed over racking & shelving system
- Restroom
