

Solutions in Action – Bandai (UK) Limited

The challenge

Southampton-based toy manufacturer, Bandai, famous for producing toys and games including Power Rangers, Badge It & Pokemon, recently called in Spaceway to provide new furnishings to update their offices and reception and accommodate their large storage needs.

Ray Dorrity, Bandai Operations Manager, also explained: “Not only did we have a massive storage requirement, but it was important to improve the overall office environment as part of our commitment to the staff.”

Spaceway's approach

Spaceway Interiors Business Manager, Ian Amos, was invited to present a proposal and remarks: “It was an exciting opportunity to provide a complete re-design of the office layouts.

“We were able to make best use of the space using 120° desking from the Senator range.

“We also specified a total of 103,000 linear metres of storage in total, which is a lot for 18 people, but has met their needs exactly.

“The overall result is that we have been able to provide Bandai with a clean and tidy environment that will serve the company well into the future as their office continues to evolve.”

Benefits delivered

“The proposal offered both value for money and innovative design which would clearly accommodate our needs.”

Solutions / products used

OFFICES

The open plan area was furnished with Senator Jigsaw Plus workstations finished in Maple melamine. Fabric covered desk-mounted screens were used around the workstations to form 3-person clusters – curved storage was also incorporated into the clusters. Around the Managers areas fabric covered floor standing screens were installed.

In the cellular offices Senator Jigsaw Plus workstations were specified, finished in the same colours as those in the open plan area and complete with 3-drawer steel pedestal units

RECEPTIONS

The Reception area was furnished with a Senator Jigsaw plus radial workstation, with a curved storage unit adjoining one end. A 1000mm high maple laminate fronted screen with transaction counter was fixed around the desk to create a lighter aesthetic and a less enclosed feeling. The workstation was completed with a tambour unit and pedestal.

The reception area was finished with some stylish visitors seating, including a 2-seater sofa and single chair from the Quorum range along with a small square coffee table.

EXECUTIVE SUITES

A special 4-metre barrel shaped table from the Intrigue range was specified for the Boardroom. This is a 2 piece unit constructed from maple veneer. The Boardroom seating was specified from the Trillipse range to match the visitors' seating in the cellular offices. Storage comprised a bank of 4 units, 2 with glass-fronted shelving units connected to the tops.
