

## Solutions in Action – Rolls-Royce Motor Cars

### *The challenge*

Spaceway was recently proud to be involved in a prestigious project providing desk screening and partitioning for Rolls-Royce Motor Cars, the exclusive car manufacturer, for their new offices in Chichester.

### *Spaceway's approach*

Senior Sales Executive Malcolm Plum was excited by the invitation to visit the site and evaluate their requirements, and was keen to present an innovative solution that would complement the office environment and corporate colour scheme.

Malcolm Comments: "Each project presents new challenges, and requires a specific solution.

"It is imperative that we work closely with our clients to ensure that every aspect of the project is considered and any problems identified. In turn, we provide a design and layout that often exceeds their expectations."

## **Solutions / products used**

### **OFFICES**

Spaceway specified Screen Solutions desk-top wave screens to match the corporate 'Vernona Red' as a means of defining desking and providing privacy while adding colour to the overall environment that coordinated well with the existing office chairs. Floor standing screens of the same colour were also installed, clearly identifying the different office areas.

Within the post area, light grey storage cupboards manufactured by Komfort Office Environments were specified to tidy away loose files and postal items.

Spaceway also designed an informal breakout area, within the layout which was created using Albion Ventura tub chairs that also matched the corporate red.

Walkways were defined using red Flooring Industry Maestro 4000 carpet tiles, and floor standing screens (also by Screen Solutions) were specified to clarify walkway interchanges and to continue the corporate theme.

### **EXECUTIVE SUITES**

Separate offices were created for the senior managers, with full-height floor standing screens. Glass was used to create an integrated feel to the overall design.
